AI & GENERATIVE AI TRACK / PROJECT 04 OF 05

LearnMate

PHASE 06 OF 08 | PROJECT TESTING

Project overview

LearnMate helps students work with scattered course materials through a REST API for uploads and AI-generated learning resources. The brief describes secure accounts, MongoDB storage, Gemini-powered content generation, and a dashboard-facing backend for saved study resources.

Project description

A study-support API for uploading learning materials and generating summaries, flashcards, quizzes, and personalized study plans.

Project status

Not stated in the source brief. Update this document when the team records an agreed status.

Project capabilities

- Study material uploads
- AI summaries and flashcards
- Practice quizzes
- Personalized study plans

Phase description

Plan and run tests that show how the solution behaves, including performance under expected load.

Project-specific phase focus

Test upload constraints, resource access, generated formats, and API failure handling.

Phase status and progress

Status: Not stated in the source material.
Progress: Not recorded in the source material.

Tasks and requirements

[ ] Choose test tools, modules, and environment
[ ] Define representative test scenarios
[ ] Capture performance results and observations
[ ] Record issues and follow-up actions

Relevant documents and data
