LearnMate

PHASE 08 OF 08 | PROJECT DEMONSTRATION

Project overview

LearnMate helps students work with scattered course materials through a REST API for uploads and AI-generated learning resources. The brief describes secure accounts, MongoDB storage, Gemini-powered content generation, and a dashboard-facing backend for saved study resources.

Project description

A study-support API for uploading learning materials and generating summaries, flashcards, quizzes, and personalized study plans.

Project status

Not stated in the source brief. Update this document when the team records an agreed status.

Project capabilities

- Study material uploads
- AI summaries and flashcards
- Practice quizzes
- Personalized study plans

Phase description

Plan a clear demonstration, show proposed features, coordinate the team, and explain future growth.

Project-specific phase focus

Demonstrate a study-material workflow and explain how the generated resources help revision.

Phase status and progress

Status: Not stated in the source material.
Progress: Not recorded in the source material.

Tasks and requirements

[ ] Plan the demo flow, timing, and responsibilities
[ ] Verify proposed features are ready to demonstrate
[ ] Agree team communication and handoffs
[ ] Document scalability limits and future plans
[ ] Record each member's demo contribution
